

PRODUCT INFORMATION SHEET

Transformer Soldering Iron

Product description

The transformer soldering iron is used to connect metallic materials by soldering using tin or lead-tin solders. Practical to use. Used to connect elements with a larger cross-section, e.g. automotive electrical installations or low-voltage domestic electrical installations.

Charakteristics

- designed to work in S2 mode – 12 second soldering with 48 second intervals;
- heats the tip quickly to 500°C;
- built-in LED illuminates the soldering point;
- high quality of workmanship guarantees failure-free operation;
- a dual-component ergonomic handle with a profiled non-slip surface ensures less hand fatigue, even during longer operation;
- included in the set is a replaceable tip, flux and tin for soldering.

Technical data

Power supply: 230 V

Mains frequency: 50 Hz
