

PRODUCT INFORMATION SHEET

Refractometer

Product description

Refractometer used to measure the properties of liquids such as resistance to freezing and electrolyte density. Mainly used in professional workshops and automotive services.

Characteristics

- body made of aluminium;
- testing the properties of liquids such as: electrolyte, coolant, washer fluid and ADBLUE, as well as ethylene glycol and propylene glycol;
- durable, resistant to fluids and weather conditions;
- measurement in the temperature range from -10°C to + 50°C;
- non-slip casing makes work easier and prevents the device from slipping out of hand.
