

PRODUCT INFORMATION SHEET

Mobile transport platform

Product description

A mobile transport platform is a universal tool that allows for easy transport of all kinds of products, tools or equipment. It was designed for demanding users. It has a durable, very well ribbed construction that can withstand a maximum load up to 150 kg. The platform consists of 4 rotating wheels, 2 of which have brakes. Designed for professional use. It is perfect for many sectors such as construction, industry, automotive and logistics.

Characteristics

- load up to 150 kg;
- two-component wheels made of ABS and elastomer;
- compatible with other elements of the modular boxes system.
