

PRODUCT INFORMATION SHEET

Manual suction cup with a manometer

Product description

The manual suction cup with a manometer is an indispensable tool designed for professionals. Carefully designed, it offers exceptional performance and versatility, meeting the requirements of even the most demanding users. It is equipped with a precise manometer, which plays a key role in monitoring and adjusting the suction power. In addition, the possibility of replacing the hand pump in the handle with HT3B342 battery pump significantly improves the work.

Characteristics

- material: aluminium + rubber;
- suction cup diameter: 200 mm;
- maximum load: 190 kg;
- equipped with a manometer.
