

## PRODUCT INFORMATION SHEET

### 200 mm swivel vise

#### Product description

You can adapt the position of the rotary fitter's vise as required and to the shape of the workpiece. Adjustment and a reliable 360° position lock around the vertical axis facilitate and speed up your work.

Using the quenched thread of the clamping mechanism, you can hold the workpiece with great force.

The vice's quenched jaws are extremely hard, and their non-slip, cross-shaped cuts prevent the workpiece from loosening.

The durable body is made of ductile cast iron, which ensures even greater impact and stress resistance.

It is covered with a rust-proof paint.

The vice's structural components are protected with a chromium coating.

The vice is permanently fixed to the ground with four screws.

#### Characteristics

- Jaw width – 200 mm;
- Material – ductile cast iron;
- Mounting – 4 screws.
