

PRODUCT INFORMATION SHEET

Double angled suction cup 50 kg

Product description

The tool is designed for handling and installing, at a selected angle, elements with flat smooth surfaces, such as ceramic tiles, laminated panels, window panes, sheet metal. The mid-length split handle allows for setting the suction cups at an angle (in the range of 90-270 degrees). The handle connection is equipped with a scale for setting the angle and a locking screw. The suction cup body is made of strong and durable aluminium. Thanks to this, the tool, despite its use in demanding conditions, will serve for many years. Moreover, its low weight and the ergonomic shape of the handle improve work comfort. The suction cup is made of durable rubber, which is both flexible and adhesive. Suction by means of a lever. It has a wide range of applications in industries such as tiling, glazing and manufacturing.

Characteristics

- Maximum vertical load capacity - 50 kg.
- Working angle – 90-270 degrees.
- Number of suction cups on the tool - 2.
- Diameter of each suction cup - 118 mm.
- Material: aluminium + rubber.
