

## PRODUCT INFORMATION SHEET

### 200mm Cordless Suction Cup with LCD Display

#### Product description

The vacuum suction cup is designed for the comfortable handling and precise laying of tiles with smooth and rough surfaces weighing up to 150 kg.

Vacuum is generated by an electric pump. Vacuum can be produced with the press of a single button.

Thanks to the well-thought-out design, the tool can be operated with one hand.

The suction cup is great for working with larger tiles.

The tool can automatically maintain the vacuum level.

If the suction force drops below 130 kg, the pump resumes operation on its own.

In addition, the device features an LCD display for full control of operation.

#### Characteristics

- Maximum load capacity - 150 kg;
- Suction cup diameter - 200 mm;
- Display with load capacity and battery charge information;
- Battery type - Li-Ion;
- Charging - via USB-C cable (included);
