

## PRODUCT INFORMATION SHEET

# Mini Compressor with Charger Function

### Product description

A wireless 3-in-1 tool combining the functions of a compressor, power bank and torch.

It is used for quickly inflating car, motorcycle and bicycle tyres, as well as balls and mattresses up to 10 bar (≈145 PSI).

The built-in USB power bank allows you to charge smartphones and other mobile devices with 5V/2A power supply, making this model an ideal emergency solution on the go.

The built-in LED flashlight facilitates pumping in conditions with no lighting.

When warning mode is selected, it allows you to inform other road users of a threat. It

operates independently, without a cable, which makes it easy to use anywhere as a wireless car compressor.

The control system allows you to precisely set the desired pressure and automatically stop pumping when the set parameters are reached, which protects the tyres. Compact size – fits in any boot. It works well both in the garage and when travelling.

### Characteristics

- Maximum operating pressure 10 Bar (≈145 PSI);
- wattage: 80 W;
- battery capacity - 6000 mAh (200 mAh \* 3);
- power bank function with USB port 5 V / 2 A;
- 3 pump tips, USB cable, case included;
- charging - USB-C from 3 to 5 hours.
